Frequently Asked Questions

Where can I find my serial number?
Please refer to the [tutorial](#).

Who can I contact for registration questions?
Contact your [local office](#) or email us at registration@ni.com.

Why should I register a product?
Product registration allows you to make use of the services associated to your product and provides National Instruments with information to provide critical product notifications.

What is the difference between registration and activation?
Registration and activation provides you with access to software product while activation provides you with features of a software product.

Why is my registration processing?
To ensure the highest quality of product registrations, some of our registration requests are handled manually. This could add extra processing time. To find more information on your product's processing status, hover over the 'In Process' text next to your product.
