# **Remote observations at Skalnaté Pleso: concept, current status**

# Remote observations at Skalnaté Pleso: concept, current status

## Telescope

- Astelco <http://www.astelco.com/>
- spring 2014
- Aperture: 1300mm
- Focal length: 10400mm
- Alt-Az mount (something new!)
- two Nasmyth focuses/ports: N1, N2
  - N1 - spectroscopy
  - N2 - CCD (CMOS) photometry:  
FilterWhell+Shutter, CCD/CMOS cameras

# Remote observations at Skalnate Pleso: concept, current status

## Devices:

- spectrograph: <https://www.shelyak.com/description-eshel/?lang=en>
  - Shelyak MuSiCoS, echelle
  - 50  $\mu\text{m}$  optical fiber (calibration, telescope)
  - parabolic colimator (D=100, f=400)
  - echelle grating - 31.6 gr/mm, blaze 64deg
  - prism (crossdiperzer)
  - teleobjective Canon 400mm f/2.8
  - FIGU (Fiber Injection & Guiding Unit)
  - CU (Calibration Unit)
    - Thorium-Argon lamp with high voltage power supply for precise calibration
    - flat lamp for echelle order geometry and blaze processing
    - electronic to control remotely calibration frame acquisition
  - CCD Andor iKon L936
    - pixel size: 13.5  $\mu\text{m}$
    - image size: 2048 x 2048
    - sensor size: 27.6 x 27.6 mm
    - binning: 1x1
  - Parameters:
    - 4200-7375 A
    - 57 spectral orders
    - spectral resolution: 4200 A (R = 18500), 4900 A (34200), 7250 A (23500)
    - SNR 4230 A (SNR=43), 5000 A (90), 6000 A (70), 7040 (55)

# Remote observations at Skalnate Pleso: concept, current status

## Devices:

- CCD ARC 4Kx4K
  - <http://www.astro-cam.com/>
  - chip STA4150A <http://www.sta-inc.net/sta4150/>
  - Pixel size: 15  $\mu\text{m}$
  - Image size: 4096 x 4096
  - Sensor size: 61.44 x 61.44mm
  - Binning: 2x2
  - FOV: 20.31' x 20.31'
  - Resolution: 0.59"/pixel
  - Area: 0.11 sq $^\circ$
- CCD Spectral Instruments – SI: (MPH) 10Kx10K
  - <http://www.specinst.com/>
- CMOS H2RG NIR
  - GLSci/Teledyne
  - chip Hg-Cd-Te
  - 70K
  - 1 filter J 1220 nm, K 2190 nm
  - no cryogenic filterwheel

# Remote observations at Skalnate Pleso: concept, current status

## Devices:

- water cooling for Andor iKon L936
  - -80degC vs. -100degC
  - price: 700€ vs. 3000US\$ - tichepc.sk
- vacuum pump: AgilentTurbo 969-9180
- sensors (temperature, pressure, humidity, skytemperature/clouds, brightness, wind, rain)
- power plugs
  - EnerGenie Programmable power strip with LAN interface (EG-PM2-LAN)
  - <https://energenie.com/item.aspx?id=7557>
  - <http://stopowerspspectrograph.ta3.sk/>
- UPS: stabilized voltage, backup
- relays: USB, GPIO, ...
- generator: backup power supply - emergency power system
- power source: US 120V/60Hz

# Remote observations at Skalnate Pleso: concept, current status

## Devices:

- Raspberry Pi: cheap, 5V power supply
  - GPIO - General Purpose Input Output
    - 5V (TTL)
    - 3.3V (CMOS logic levels)
    - GND
    - PWM (Pulse-Width Modulation)
    - UART - RXD, TXD - RS232
  - typical use: remote (via TCP/IP - ethernet) Watec CCD@FIGU: mirror, exposure time, gain
  - <http://wiringpi.com/>
- Zotac PC:
  - minicomputer, SBC (Single Board Computer)
  - fanless
  - SSD
  - minimal heating
  - Intel vs ARM CPU
  - LAN: 1Gbps

# Remote observations at Skalnate Pleso: concept, current status

## Devices: PROBLEMS

- cryocoolers: hoses torsion - derotator
- condensed water on CCD entrance window:
  - blow nitrogen gas over the window, at a small flow rate
  - install a wire heater around the perimeter of the window (anti-dew-heater)
- reverse logics of the ACE FW shutter: 0-5V
- interfaces/connectors: USB, no ethernet: distance
- relay board in Shelyak CU - does not report state (On/Off)
- US 120V/60Hz vs. EU 230V/50Hz, US plugs
- screws: imperial vs. metric
- place for cables, fibers inside the telescope - missing ducts and/or microducts
- lack of documentation (e.g. Astelco ADAM)

# Remote observations at Skalnate Pleso: concept, current status

## Observations: new software

### MOTIVATION/OBJECTIVES:

- image acquisition: astronomy is an "image science" - the observations are mostly about "taking pictures"
  - various software:
    - MaxImDL (Win),
    - ekos/kstars (linux),
    - owl (java - platform independent)
    - Spectral Instruments---> not effective, too many to handle
  - no usable software for some new devices:
    - ARC CCD: owl (java) - no FW, etc..
    - ACE FW: very simple ASCOM driver
  - hard to integrate new devices, various manufacturers
  - some hardware delivered with just API (Application Programming Interface)
    - ARC: API - C++, java
    - ACE: RS232 communication, protocol description
  - integration of a locally manufactured hardware
  - distributed: dedicated computers to handle one device, typically close to it, interconnected via TCP/IP. Easier to find an error (?)
- 
- observations: automatic vs. remote - dome doors, snow, ...

# Remote observations at Skalnate Pleso: concept, current status

## Observations: new software

INDI/INDIGO vs. ASCOM - ekos vs. MaxImDL:

- ASCOM:
  - all your devices need to be connected to a single Windows host
  - not open: standards are set by two HW producers
- INDI/INDIGO
  - Instrument Neutral Distributed Interface
  - device described in abstract entities
  - <https://indilib.org/>
  - <http://www.indigo-astronomy.org>
  - free
  - open (GNU copyleft)
  - crossplatform, multi platform
  - client agnostic
  - distributed
  - better control (modular) - easier to find/localize an error/problem

# Remote observations at Skalnate Pleso: concept, current status

## Observations: new software

### INDI/INDIGO CURRENT STATUS:

- CCDs:
  - Andor iKon L 936 - (Rumen Bogdanovski - INDIGO)
  - FLI + FilterWheel
  - SBIG
  - Moravian Instruments
  - Atik (FIGU at SP)
  - ARC 4Kx4K (RK - INDI)
- FilterWheels
  - ACE FW (RK - INDI)
- Telescope
- Dome
- Weather Stations
  - AAG - Lunatico
- AUX
  - Shelyak eShel CU
  - WatecRemote (RK - INDI)
    - 20190218: gain - remote handle for Watec camera --> spectroscopy fully operable remotely

# Remote observations at Skalnate Pleso: concept, current status

## Observations: new software

### INDI/INDIGO FUTURE:

- close future
  - Astelco focuser
  - guider
- more distant
  - automatization of SP big dome doors/enclosures (mechanical issues), possible at given dome azimuth - electric power, <https://www.astronomical.com/observadome/>
- ???
  - ASCOL (Rumen Bogdanovski - INDIGO) - ProjectSoft controller (small dome)ASCOL (Rumen Bogdanovski - INDIGO) - ProjectSoft controller (small dome)

# Remote observations at Skalnate Pleso: concept, current status

## MISC

- PhotoDocumentation
  - <https://www.sto.ta3.sk/misc/FotoDokumentacia/pristroje/>
- Journals
  - [https://www.sto.ta3.sk/misc/instrument\\_journals/](https://www.sto.ta3.sk/misc/instrument_journals/)
- SAFETY
  - nobody present at the roof, dome
  - nothing obstructing telescope (ladder, crane)
- Packages:
  - repo: <https://www.sto.ta3.sk/RPMs/sto.repo>
    - sto
    - stoPowerOnOff
    - stoAstelco
    - stoSpectrograph
  - indi-watecremote-bleeding
  - indi-arccd-bleeding
  - indi-acefilterwheel

# Remote observations at Skalnate Pleso: concept, current status

## DEMO

- SAFETY
  - dome doors closed
  - colleague Sivanič - present at Skalnate Pleso
  - phone
- sensors (weather)
  - AAG cloudwatcher <http://www.lunatico.es/ourproducts/aag-cloud-watcher.html>
    - <http://spcloudaag.ta3.sk/>
  - SNMP TCP/IP thermometer + humidity + pressure
    - [https://www.sto.astro.sk/archives/STOsensors/rrdtool/STOd\\_temperature\\_M1\\_BD.html](https://www.sto.astro.sk/archives/STOsensors/rrdtool/STOd_temperature_M1_BD.html)
    - [https://www.sto.astro.sk/archives/STOsensors/rrdtool/STOa\\_temperature.html](https://www.sto.astro.sk/archives/STOsensors/rrdtool/STOa_temperature.html)
    - [https://www.sto.astro.sk/archives/STOsensors/rrdtool/STOc\\_humidity.html](https://www.sto.astro.sk/archives/STOsensors/rrdtool/STOc_humidity.html)
- PowerOnOff
  - `rkomzik@spsto3: /usr/bin/stoPowerOnOff`

# Remote observations at Skalnaté Pleso: concept, current status

## DEMO

- AsTelIOS + Foscam camery
  - rkomzik@spsto3: /usr/bin/stoAstelco\_run
  - <https://www.sto.astro.sk/private/DomeCameras/>
  - vlc: rtsp://viewer:STOkamerkaSP@STOcamSP1.ta3.sk:88/videoMain  
rtsp://viewer:STOkamerkaSP@STOcamSP2.ta3.sk:88/videoMain
- Spectroscopy
  - observer@SPpcSpectrograph: MaxImDL
  - rkomzik@spsto3: /usr/bin/stoPowerOnOff - vlc for Watec@FIGU
  - rkomzik@spsto3: kstars: ekos - indi: WatecRemote, Shelyak-eShell
